

Action Plan: Michael Geiger 12.02.2023

What do I want/need to learn?	What do I have to do to achieve this?	What resources or support will I need?	How will I measure success?	Target dates for review and completion
Participate in scientific and professional organisations.	Starting a career in an academic or professional organisation.	Teaching staff support for the successful creation of the Capstone project and thus the completion of the MSc cyber security degree.	The measurement takes place on the one hand through the completion of the MSc cyber security and on the other hand through a successful career start.	End of 2023.
Critically analyse complex ideas in concepts in the field of Computer Science.	Self development	Teaching staff support	Since the Capstone project requires this competence, the assessment of the project can be used to measure success.	07.10.2023
Create, discuss and deliver strategies for sustainability for all stakeholders (company, community and environment)	Self development	Library support	The competence to create, discuss and hand over strategies for sustainability is an ongoing process. Regular reflections on one's own competencies help to evaluate one's own level of development.	First self-reflection 01.05.2023
Python (Programming)	Self development & ongoing course of the MSc cyber security	Teaching staff support & library support	The success can be measured through the Capstone project as well as small private projects to assess the progress of my skills.	07.10.2023
